---

## ABOUT ME.

I am a front end developer who initially got into the world of coding in order to support myself financially, but from the very first moment I wrote my first “Hello World” I realized it wasn’t something I was going to do just to survive but also I developed a passion for software development. I fell in love with the idea of creating projects, solving problems and having the opportunity to work with other developers from different places around the globe.

I am currently still learning new technologies as one is always learning new things as a developer but I have a satisfactory knowledge of the basic skills needed to be a developer. I aim to leverage my skills to successfully fill the front end developer role in your company.

---
